

FISHING SUPPLIES AND EQUIPMENT COST COMPARISON

All major fixed assets are based on the low average cost for used equipment.

Seasonal costs are used where appropriate.

Total of fixed assets is nearly \$10,000. That's about 7,500% more than the price of a Magnabait®; which should double or triple their effective value.

The price of the Magnabait®; is \$199-\$249 less any discounts that we promised.

When you consider the benefits, it's an outstanding deal. If you need it, we'll break it down into three easy payments. If you can't afford that, share it with a friend and split the cost.

The Magnabait®; isn't cheap. One reason is that we didn't build it cheap. We couldn't and we wouldn't or we'd go broke on the warranty. We've also got that \$2,000,000 we spent on the five years of research. Our investors think it's about time they start getting their money back. So do we.

Believe me, you'll prosper from the Magnabait®; long before we'll see our first dime of profit.

I promised you two surprises so before you order, a funny serving of food for thought that you'll get a kick out of. Your own DREAM BUSINESS. Imagine this:

Your own Magnabait®; Dream Business For Sale

Product fish	fresh
